

## Welsh goods exports, 2019

31 March 2020  
SB 10/2020

### Main points

- The value of Welsh goods exports was £17.7 billion in 2019, an increase of £0.52 billion (3.0%) from the previous year.
- Exports to EU countries increased by £0.16 billion (1.5%) and to non-EU countries by £0.36 billion (5.4%). Exports to the EU accounted for 60.4% of Welsh exports, compared with 48.2% of UK exports.
- Germany was the top export destination, accounting for 16.2% of exports, though the proportion fell from 18.1% in the previous year.
- Exports from Wales are dominated by the Other Transport Equipment (transport equipment other than road vehicles) category which made up 23.8% of total exports.

**Table 1: Value of Welsh and UK exports by destination**

	Destination	Amounts (£ billions)		Percentage Change
		2018	2019	
<b>Wales:</b>	EU	10.5	10.7	1.5%
	Non-EU	6.7	7.0	5.4%
	<b>Total</b>	<b>17.2</b>	<b>17.7</b>	<b>3.0%</b>
<b>UK:</b>	EU	170.0	167.2	-1.7%
	Non-EU	169.5	179.3	5.8%
	<b>Total</b>	<b>339.5</b>	<b>346.5</b>	<b>2.1%</b>

### About this bulletin

This bulletin summarises HM Revenue and Customs estimates of goods exports from Wales in 2019, providing comparisons with the UK.

The figures are modelled estimates. Exports are allocated to UK countries and regions based on the proportion of employees in that area.

Figures relate to goods exported to destinations outside the UK. They do not include service exports.

# 1. Welsh goods exports by destination

The value of exports from Wales increased by £0.52 billion (3.0%) to £17.7 billion in 2019. Exports to EU countries were up £0.16 billion (1.5%) and exports to non-EU countries up by £0.36 billion (5.4%). The value of exports from the UK also increased over this period, up 2.1%, with exports to EU countries down by 1.7% and exports to non-EU countries up by 5.8%.

**Chart 1.2: Exports by year and destination, UK (£b)**

Source: WG analysis of Regional Trade in Goods Statistics, HMRC

In 2019, Germany was the largest export market for Welsh products followed by France, USA (including Puerto Rico), Ireland and the Netherlands. Compared with the previous year, exports to four of the top five countries increased. Exports to USA showed the largest absolute increase, up £298 million (12.2%). Germany showed the largest decrease, down £245 million (7.8%).

Outside the top five destinations, exports to United Arab Emirates had the largest fall, down £36 million (7.1%). Exports to China increased by £28 million (7.5%).

**Table 1.1: Top 10 destinations for Welsh exports (£m)**

Country	2018	2019	Change	
			Level	Percentage
Germany	3,120	2,875	-245	-7.8%
France	2,684	2,811	127	4.7%
USA (including Puerto Rico)	2,445	2,743	298	12.2%
Ireland	1,517	1,687	170	11.2%
Netherlands	746	969	223	29.8%
Belgium	569	541	-28	-4.9%
Spain	492	464	-27	-5.5%
United Arab Emirates	498	463	-36	-7.1%
China	379	407	28	7.5%
Turkey	337	339	1	0.4%

## 2. Welsh exports by product

Other Transport Equipment (transport equipment other than road vehicles) was the category with the highest value in 2019, followed by Petroleum, Petroleum Products & Related Materials. Three of the top ten products declined over this year compared to a year earlier. The overall increase in exports from Wales was mainly due to increases in Power Generating Machinery and Equipment (up £311 million, 16.2%), Petroleum, Petroleum Products & Related Materials (up £151 million, 6.8%) and Medicinal & Pharmaceutical Products (up £132 million, 21.0%). The Iron & Steel product group saw the largest absolute decrease, down £55 million (5.7%).

**Table 2.1: Top 10 products for Welsh exports (£m)**

Product sector	2018	2019	Change	
			Level	Percentage
Other Transport Equipment	4,166	4,207	41	1.0%
Petroleum, Petroleum Products & Related Materials	2,226	2,377	151	6.8%
Power Generating Machinery & Equipment	1,917	2,228	311	16.2%
Iron & Steel	978	923	-55	-5.7%
Electric Machinery, Apparatus & Appliances & Electric Parts Thereof N.E.S	760	804	43	5.7%
Medicinal & Pharmaceutical Products	628	760	132	21.0%
Road Vehicles, incl. Air Cushion Vehicles	594	585	-8	-1.4%
Professional, Scientific & Controlling Ins & Apparatus N.E.S.	424	492	69	16.2%
Miscellaneous Manufactured Articles N.E.S.	477	435	-42	-8.8%
Chemical Materials & Products N.E.S	386	427	40	10.5%

<sup>1</sup> Category names have been shortened on charts. Petroleum & Related Materials is Petroleum, Petroleum Products and Related Materials; Electric Machinery is Electric Machinery, Apparatus and Appliances and Electric Parts Thereof NES; Professional & Scientific Apparatus is Professional, Scientific and Controlling Ins and Apparatus NES.

The three largest export products for Wales are Other Transport Equipment (transport equipment other than road vehicles), Petroleum, Petroleum Products & Related Materials and Power Generating Machinery & Equipment. France and Germany combined receive 93% of Welsh exports of Other Transport Equipment (47% and 46% respectively). Ireland receives 43% of Welsh exports in Petroleum, Petroleum Products & Related Materials. The USA receives 24% of Welsh exports of Power Generating Machinery & Equipment. (Charts 3.4 - 3.6)

## Key quality information

### Relevance

This bulletin contains analysis of [HMRC Regional Trade in Goods Statistics \(RTS\) data for 2018 and 2019](#). These statistics are used by us to monitor the performance in goods exports for Wales, as well as providing comparisons to the UK and other regions. This bulletin is also used by other public sector organisations, businesses, academia and private individuals.

### Accuracy

The data in this bulletin are the Regional Trade in Goods Statistics (RTS) published by HMRC. These statistics refer to goods that have crossed the UK frontier. This means that exports from Wales to other parts of the UK are not included and there is no element included for components produced in Wales when the final product is completed in and then exported from another part of the UK. HMRC does not receive information in respect of goods that move wholly within the UK. Further, these figures do not contain any information on the export of services such as banking or tourism.

### Timeliness and punctuality

Regional Trade in Goods Statistics are published quarterly by HMRC in March, June, September and December. Headline exports statistics are published by us at the same time.

### Accessibility and clarity

Exports data are published on [StatsWales](#). [The headline statistics and statistical report are available on our website](#). The latest [HMRC quarterly Regional Trade in Goods Statistics \(RTS\) release is available from the HM Revenue & Customs website](#).

### Comparability and coherence

1. Comparable measures for other UK countries are published on StatsWales.
2. Data shown for the European Union (EU) are based on the 28 member states which comprised the EU (that is the 28 states less the UK, as only exports to destinations outside the UK are covered). This includes Croatia which joined the EU on 1 July 2013.
3. The quarterly totals of the value for RTS do not equate to the totals already published as the UK-wide Overseas Trade in Goods Statistics. Certain goods, such as North Sea crude oil, ships and aircraft stores, and those not in free circulation, that are shipped to EU countries using traditional Customs declarations, are not allocated to a UK region. Exports relating to overseas companies, registered for VAT in the UK, but with no place of business in the UK, have been excluded. Channel Islands and Isle of Man trade is also excluded. In addition, some exports to countries outside the EU cannot be allocated to a region because the VAT registration numbers have not been properly declared. These exclusions mean that it is not possible to reconcile total figures for regional trade against figures for UK trade.
4. Data are collated using the [Standard International Trade Classification \(SITC\) system](#).

## **Methodology**

From 1 May 2016, there was a methodological change to the way the Non-EU trade-in-goods statistics are compiled. Following a change in legislation, the Non-EU trade-in-goods statistics have changed from the 'General Trade' system of compilation to the 'Special Trade' system. For further information on the differences between General and Special Trade, please see the [HMRC Methodology Paper for Overseas Trade in Goods Statistics](#). Special Trade data is only available for 2013 Q1 onwards. All data in this bulletin is Special Trade.

HMRC has revised the methodology used to calculate Regional Trade in Goods Statistics. Business trade is now allocated to a region based on the proportion of employees in that region rather than where the location of the Head Office of the business is. Under the old methodology Welsh EU exports accounted for 39.2% reported for the four quarters ending in June 2016. The new methodology stands at 60.9% for the four quarters ending in June 2016. Data are available under the new methodology from 2013 Q1. It is inappropriate to compare current data with data prior to 2013 and it has been excluded from this bulletin. [Further information on the quality, revisions and methodology of the data can be found on the HMRC website.](#)

## **Revisions**

Following the identification of an error in the calculation of these statistics, HMRC revised its data for 2013 quarter 1 to 2017 quarter 1 on the 12 October 2017.

Data for previous quarters have been revised in accordance with the HMRC revision policy where data on exports for the current calendar year may be validated and revised at any time, while data on exports for the previous calendar may be validated and revised until just after the second quarter figures for the current calendar year are published.

Any figures which are currently provisional are marked with '(p)' and are subject to revision. Revisions to the data arise as a result of including trade amendments and late submissions received by HM Revenue and Customs. Figures are provisional for up to 18 months.

For data from our own outputs, we follow the [Welsh Government revisions policy](#).

## National Statistics status

The [United Kingdom Statistics Authority](#) has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the [Code of Practice for Statistics](#).

National Statistics status means that official statistics meet the highest standards of trustworthiness, quality and public value.

All official statistics should comply with all aspects of the Code of Practice for Official Statistics. They are awarded National Statistics status following an assessment by the UK Statistics Authority's regulatory arm. The Authority considers whether the statistics meet the highest standards of Code compliance, including the value they add to public decisions and debate.

It is Welsh Government's responsibility to maintain compliance with the standards expected of National Statistics. If we become concerned about whether these statistics are still meeting the appropriate standards, we will discuss any concerns with the Authority promptly. National Statistics status can be removed at any point when the highest standards are not maintained, and reinstated when standards are restored.

These statistics last underwent a [full assessment against the Code of Practice](#) in 2013. Since the latest review by the Office for Statistics Regulation, we have continued to comply with the Code of Practice for Statistics, and have made the following improvements:

- Removed large tables of data from the release and ensured that the data is available in online interactive tables
- Improved visuals and commentary to make it easier for the readers to draw out key messages

## Well-being of Future Generations Act (WFG)

The Well-being of Future Generations Act 2015 is about improving the social, economic, environmental and cultural well-being of Wales. The Act puts in place seven well-being goals for Wales. These are for a more equal, prosperous, resilient, healthier and globally responsible Wales, with cohesive communities and a vibrant culture and thriving Welsh language. Under section (10)(1) of the Act, the Welsh Ministers must (a) publish indicators ("national indicators") that must be applied for the purpose of measuring progress towards the achievement of the Well-being goals, and (b) lay a copy of the national indicators before the National Assembly. The 46 national indicators were laid in March 2016.

Information on the indicators, along with narratives for each of the well-being goals and associated technical information is available in the [Well-being of Wales report](#).

Further information on the [Well-being of Future Generations \(Wales\) Act 2015](#).

The statistics included in this release could also provide supporting narrative to the national indicators and be used by public services boards in relation to their local well-being assessments and local well-being plans.
